

Visiting the St Albans Community

Description

Yesterday, The people of St Albans hosted a visit from myself, the Mayor, fellow Councillors and Council staff to catch up about how Council is serving that community.

Far from being overlooked, the “Forgotten Valley” tracing the course of the MacDonald River is one of the most beautiful parts of the Hawkesbury, and the effective provision of infrastructure and services is important to us. Ongoing programs of Council are repairing roads, have renovated the local Tennis Courts, and support initiatives in parks, tourism, and so on.

Locals, including Stephen Brown, President of the [MacDonald Valley Association](#) brought a range of issues before us, including renovation of the School of Arts Hall, planning controls on flood-affected land, the responsiveness of Council to inquiries, and the state of road and ferry services.

It was a pleasure to meet the MacDonald Valley community and listen to them.
