

## The Hawkesbury-Nepean River Floods – March 2022

### Description

**July 2022 update. It's flooding again. Again.**

**I have been talking about flooding on the Hawkesbury-Nepean river for many many years. If you've arrived at this page as the result of a Google search, please consider these resources:**

- [My more recent video and post about the July 2022 floods, with some very striking video](#)
  - [All my output on this website about flooding.](#)
  - [My Facebook page, where I regularly post updates during times of flood, as well as other content relevant to residents of the Hawkesbury.](#)
  - [My YouTube channel. This link should prioritise my videos about flooding. Please subscribe.](#)
- 

*Original March 2022 post:*

Flooding has again struck our community for the second time in 12 months.

This flood has risen to 13.7m (as measured at Windsor – which tends to be the benchmark), beating last year's flood of 12.9m making it approximately a 1-in-20 year event.

---

This video was taken when the waters still had about 2 more meters to rise.

I'm indebted to the excellent [Hawkesbury Flood Statistics](#) facebook page for making excellent real-time data available about river heights and closures.

Here's their summary after the waters subsided:

# Hawkesbury Flood Statistics

## March 2022 Data Summary

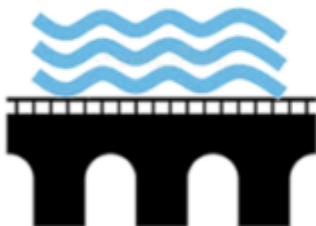

### PEAK LEVELS

	2022	2021	2020
<b>Windsor</b>	13.714m	12.912 m	9.225m
